FINALS STUDY TIPS

Chances are you're going to study a lot in the next few days. Here are some hints to help you prepare to do a great job on all your final exams.

- ✓ It is best to review the material right after class when it's still fresh in your memory.
- ✓ Don't try to do all your studying the night before the test.
- ✓ Have all of your study material in front of you: lecture notes, course textbooks, study guides and any other relevant material.
- ✓ Find a comfortable and quiet place to study with good lighting and little distractions (avoid your bed).
- ✓ Start out by studying the most important information.
- ✓ Learn the general concepts first, don't worry about learning the details until you have learned the main ideas.
- ✓ Take notes and write down a summary of the important ideas as you read through your study material.
- ✓ Take short breaks frequently.
- ✓ Space out your studying, you'll learn more by studying a little every day instead of waiting to the last minute.
- ✓ Make sure that you understand the material well, don't just read through the material and try to memorize everything.
- ✓ If you choose to study in a group, only study with others who are serious about the test.
- ✓ Test yourself or have someone test you on the material to find out what your weak and strong areas are.
- ✓ Listening to relaxing music such as classical or jazz on a low volume can relieve some of the boredom of studying.
- ✓ Don't study later than the time you usually go to sleep. Instead, try studying in the afternoon or early evening.
